Test Raporu

03 Ocak 2026 16:49

Gateway API

org.example.gateway_api
Sürüm: 1.0.0
Spring Boot 3.5.6

Başarı Oranı
100%

59 test • **59** başarılı • **0** başarısız • **71**% kapsama

59	59	0
Toplam Test	Başarılı	Başarısız

Proje Bilgileri

PROJE	SÜRÜM	ÇERÇEVE (FRAMEWORK)	TEST ALTYAPISI
Gateway API	1.0.0	Spring Boot 3.5.6	JUnit 5 + Mockito

Kod Kapsaması

Minimum gereksinim: %30   **71%**

Test Grupları

TEST GRUBU	TEST SAYISI	DURUM
DataStoreTest$ActionItemTests	1	● Başarılı

Test Detayları

TEST ADI	SÜRE	DURUM
Should save and retrieve action items	0.025s	● Başarılı
Should clear cache for specific meeting	4.214s	● Başarılı
Should calculate user statistics correctly	0.038s	● Başarılı
Should save and retrieve summary successfully	0.003s	● Başarılı

TEST ADI	SÜRE	DURUM
Should filter summaries by platform	0.002s	● Başarılı
Should return last summaries with limit	0.006s	● Başarılı
Should return empty when summary not found	0.002s	● Başarılı
Should return empty when transcription not found	0.002s	● Başarılı
Should save and retrieve transcription successfully	0.013s	● Başarılı
Should consume and save action items	1.153s	● Başarılı
Should handle many action items	0.009s	● Başarılı
Should handle empty action items list	0.005s	● Başarılı
Should handle ZOOM platform summary	0.007s	● Başarılı
Should consume and save summary	0.007s	● Başarılı
Should handle long transcription	0.005s	● Başarılı
Should consume and save transcription	0.006s	● Başarılı
Should return token for valid credentials	0.016s	● Başarılı
Should return error for invalid password	0.009s	● Başarılı
Should return error for invalid username	0.004s	● Başarılı
Should return error for invalid token	0.916s	● Başarılı
Should refresh valid token	0.027s	● Başarılı
Should return empty stats when no data	0.007s	● Başarılı
Should return dashboard statistics	0.004s	● Başarılı
Should return all meetings without filter	0.005s	● Başarılı
Should handle empty platform filter	0.006s	● Başarılı
Should filter meetings by platform	0.006s	● Başarılı
Should return meeting detail when found	0.022s	● Başarılı
Should return 404 when meeting not found	0.005s	● Başarılı

TEST ADI	SÜRE	DURUM
Should return 404 when summary not found	0.006s	● Başarılı
Should return summary when found	0.004s	● Başarılı
Should return 404 when transcription not found	0.008s	● Başarılı
Should return transcription when found	0.005s	● Başarılı
Should continue filter chain without Authorization header	0.748s	● Başarılı
Should not authenticate with invalid token	0.008s	● Başarılı
Should handle empty Bearer token	0.007s	● Başarılı
Should authenticate with valid token	0.07s	● Başarılı
Should handle exception gracefully	0.036s	● Başarılı
Should not authenticate with non-Bearer token	0.006s	● Başarılı
Should return correct expiration time	0.2s	● Başarılı
Should generate valid token for username	0.068s	● Başarılı
Should generate different tokens for same user	1.008s	● Başarılı
Should extract username from token	3.609s	● Başarılı
Should extract different usernames correctly	0.008s	● Başarılı
Should reject malformed token	0.004s	● Başarılı
Should validate correct token	0.005s	● Başarılı
Should reject expired token	0.029s	● Başarılı
Should reject invalid token	0.014s	● Başarılı
Should not filter WebSocket endpoints	0.008s	● Başarılı
Should filter regular API endpoints	0.006s	● Başarılı
Should not filter health check endpoint	0.004s	● Başarılı
Should block request when limit exceeded	0.144s	● Başarılı
Should allow request within limit	0.004s	● Başarılı

TEST ADI	SÜRE	DURUM
Should use authenticated user as key	0.129s	● Başarılı
Should use X-Forwarded-For header for IP	0.003s	● Başarılı
Should send action items notification	0.024s	● Başarılı
Should handle WebSocket send exception gracefully	0.247s	● Başarılı
Should send summary notification to subscribers	0.011s	● Başarılı
Should not send to closed sessions	0.011s	● Başarılı
Should send transcription notification	0.012s	● Başarılı
